COST EFFECTIVE
VERTICAL ANGLE INSTRUMENT
FOR
BENCH DRILL RIGS

TRANSTRONIC AB

This system is designed to measure the angles on a bench drill rig, drilling vertical holes. It is easy to mount and operate on any type of bench drill rig.

The system consists of one indicator, one angle transducer and one connection box for connecting the cables. LED's in different colors show the angles of the feeder at all times and makes it easy to manouver the feeder into a vertical position.

General data:

Power supply	24 VDC
Power consumption	0,2 A
Working temperature	-20 - +50 °C
Environmental protection	IP65

Angle measuring:

Green LED	Vertical to $\pm 1^\circ$
Yellow LED	$\pm 1^\circ$ to $\pm 2^\circ$
First Red LED	$\pm 2^\circ$ to $\pm 3^\circ$
Second Red LED	$\pm 3^\circ$ to $\pm 4^\circ$
Third Red LED	More then $\pm 4^\circ$
Accuracy	$\pm 0.5^\circ$
