

INKLINATOR® CMD

Inklinator CMD is an angle measurement system based on latest **CAN Open** technology. The system consists of an angle transducer that measures 2 axis $\pm 40^\circ$ and is mounted on the feeder. The easy to read display unit displays the angles in 2 planes and is mounted close to the operator for best visibility.

Increased flexibility = Increased productivity

Technical Specifications

Specification:

Measurement range:	Side angle	±40°
	Inclination angle	±40°
Power supply:		10 – 30 VDC, 0,2A
Enclosure:		IP67
Working temperature:		-20 - +50 degrees Celcius
